

Environmental protection box for harbors and vessels

In co-operation with the Environmental health committees in different municipalities, The Swedish Navy and Ecobark AB an environmental protection box has been developed. The box is delivered with 15 absorption booms (each in 6 meter length), 5 sacks of Ecobark absorption powder (each 50 liter), 4 spreading buckets and 10 mini absorption booms (each one meter).

The box is strengthened for easy lifting with fork-lift truck, and have 4 eye bolts for easy lifting with a crane.

The measurements of the box is; length 2000mm, breadth 1000mm and height 1000mm.
